

AC COUCHEMENT

- SPOT TEST 76 -

(Filled answers 1/1)

- CaT

01

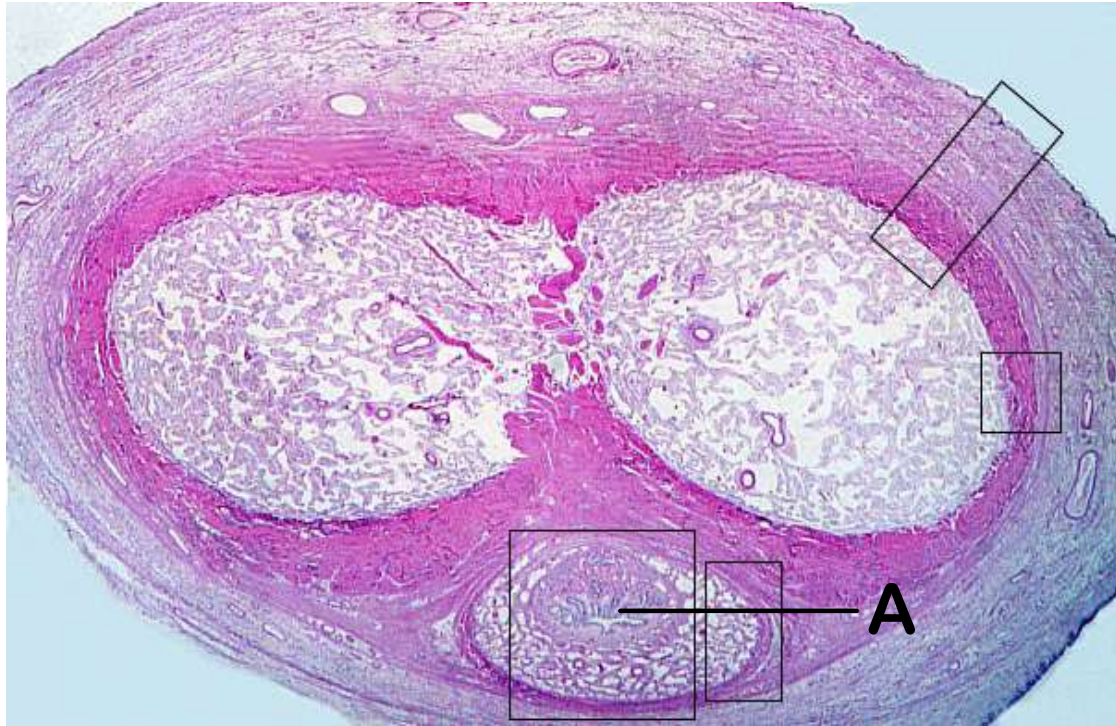

Fibromuscular stroma

- A. What is the specific type of stroma in this organ?
- B. What part of urethra passes through the structure?

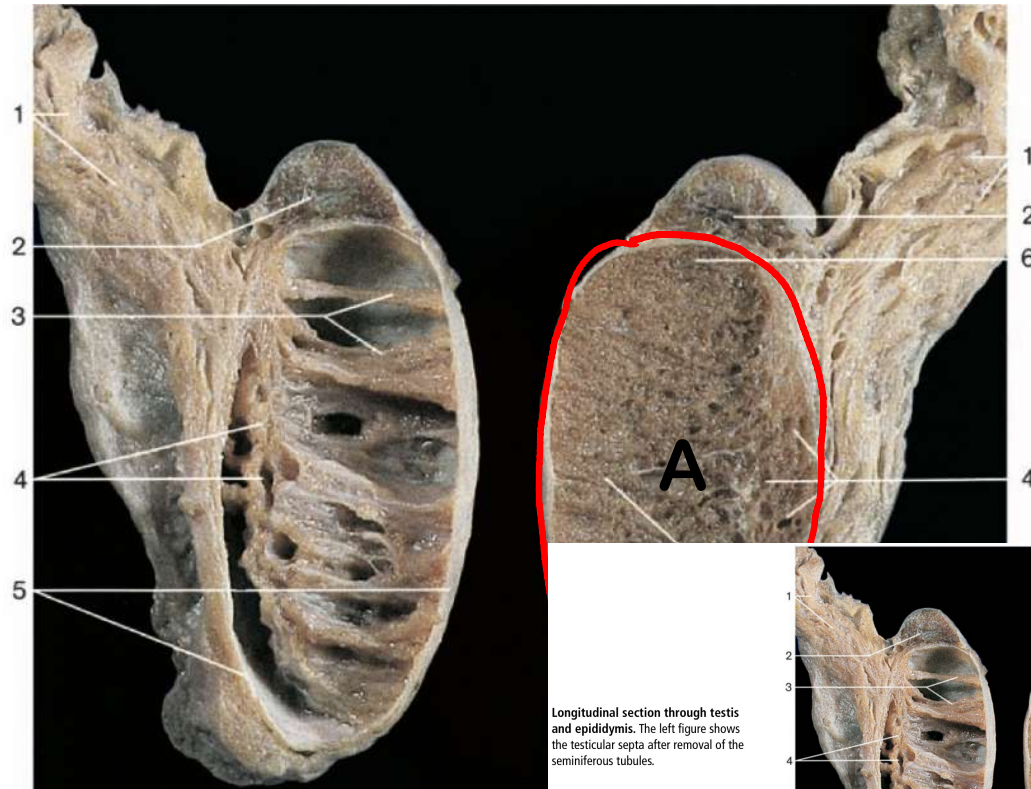

Prostatic urethra

02

- A. Identify structure A Spongy/penile urethra
- B. Name 3 fluids that pass this area Urine, semen, mucous

03

- 1 Spermatic cord (cut surface)
- 2 Head of epididymis (cut surface)
- 3 Septa of testis
- 4 Mediastinum testis
- 5 Tunica albuginea
- 6 Superior pole of testis
- 7 Convolutd seminiferous tubules
- 8 Inferior pole of testis

A. Identify structure A
B. Identify structure 5

Testis

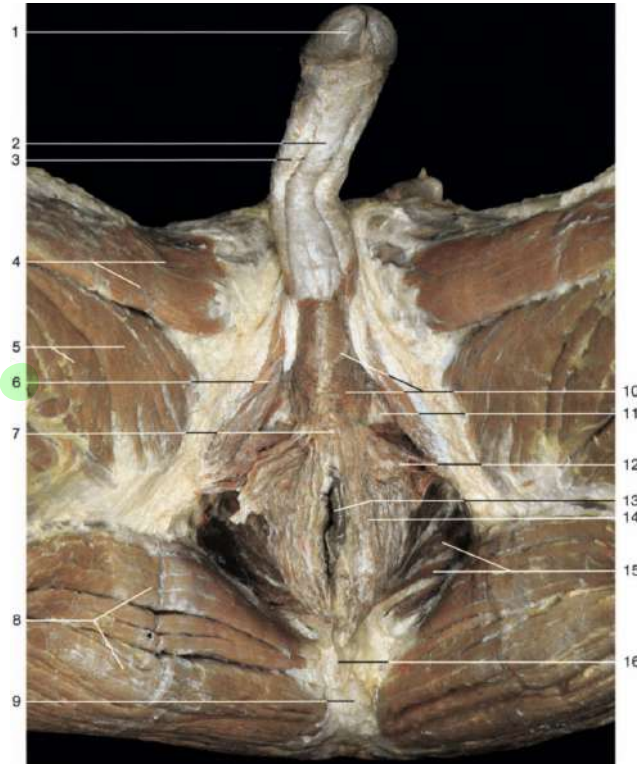

Tunica albuginea

04

- A. Identify structure 3 Prostate gland
- B. Identify structure 10 Urinary bladder

05

A. Identify muscle 6

Ischiocavernosus m.

B. Identify structure 3

Left crus of penis with Ischiocavernosus m.

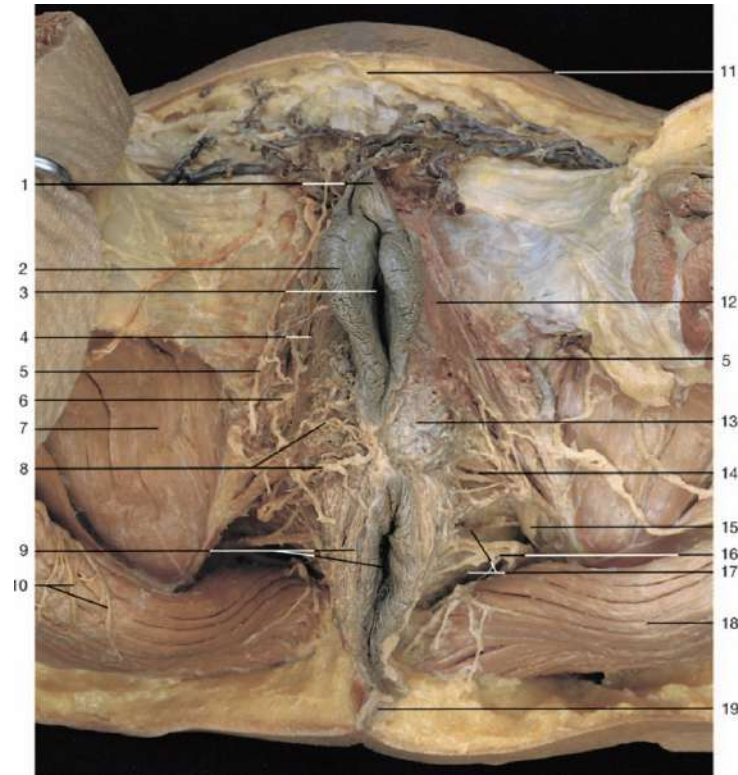

06

A. Identify structure A (clue : part of urethra) Penile urethra

B. Identify structure 14 Corpus spongiosum of penis

07

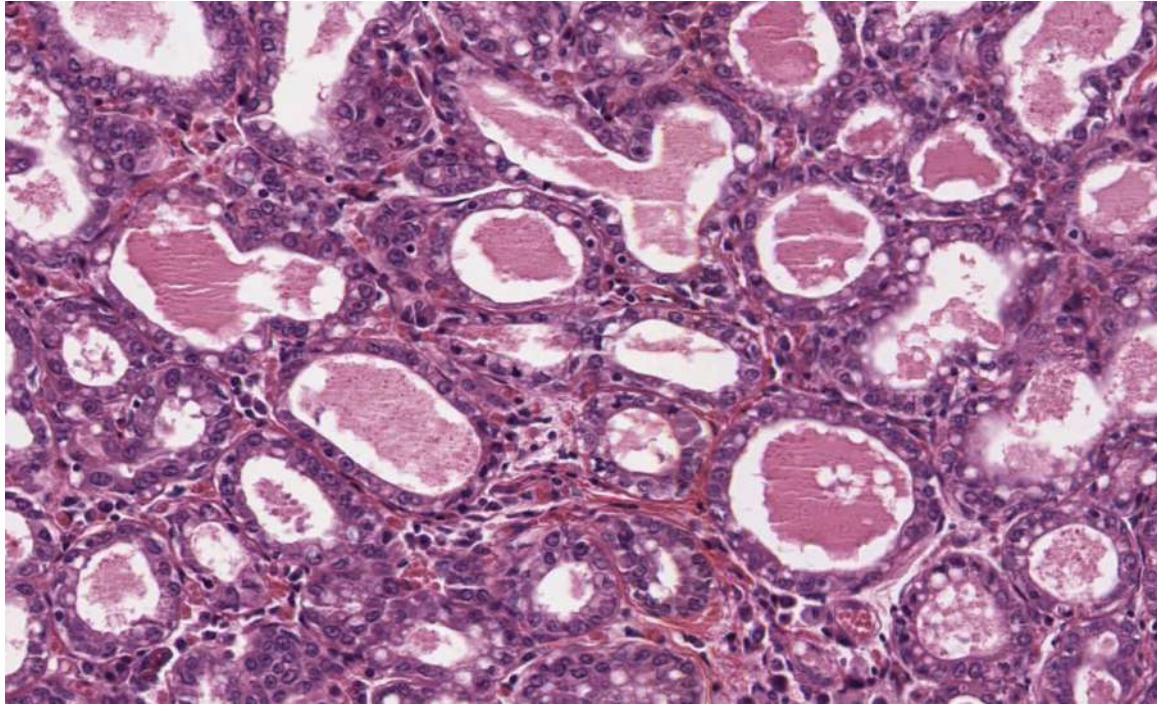

A. Identify structure 11

Mons pubis

B. Tell its nerve supply

Ilioinguinal n.

08

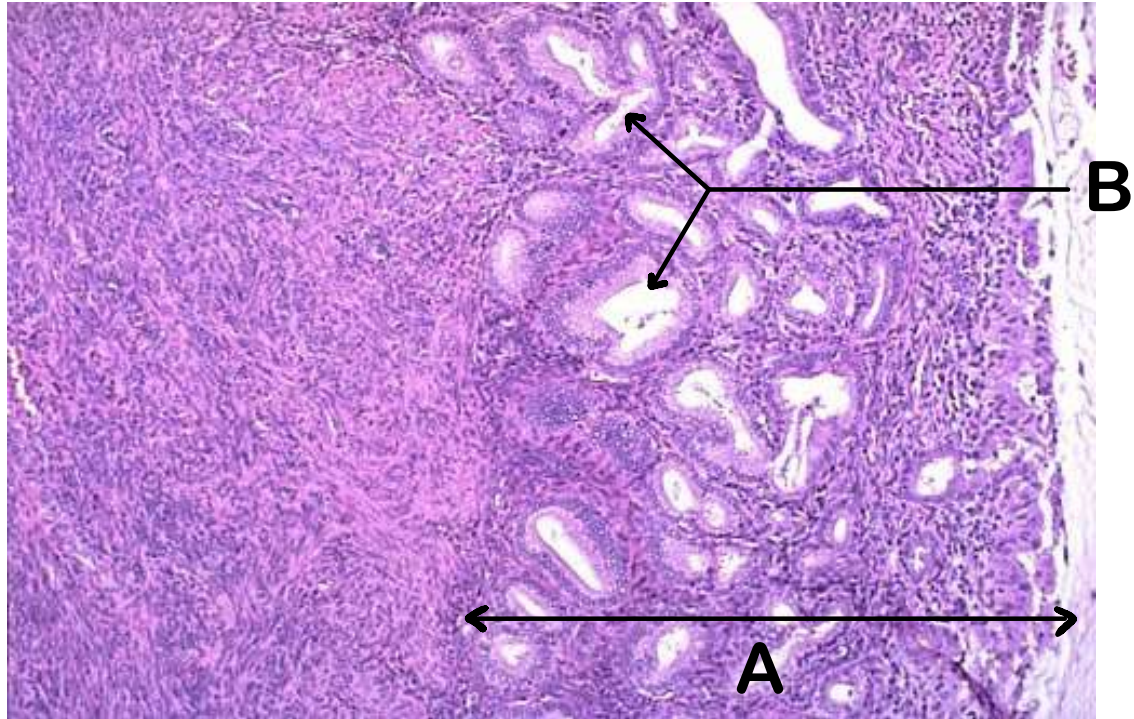

A. Identify the organ

Mammary gland

B. Tell its specific stage

Active ,lactating stage

09

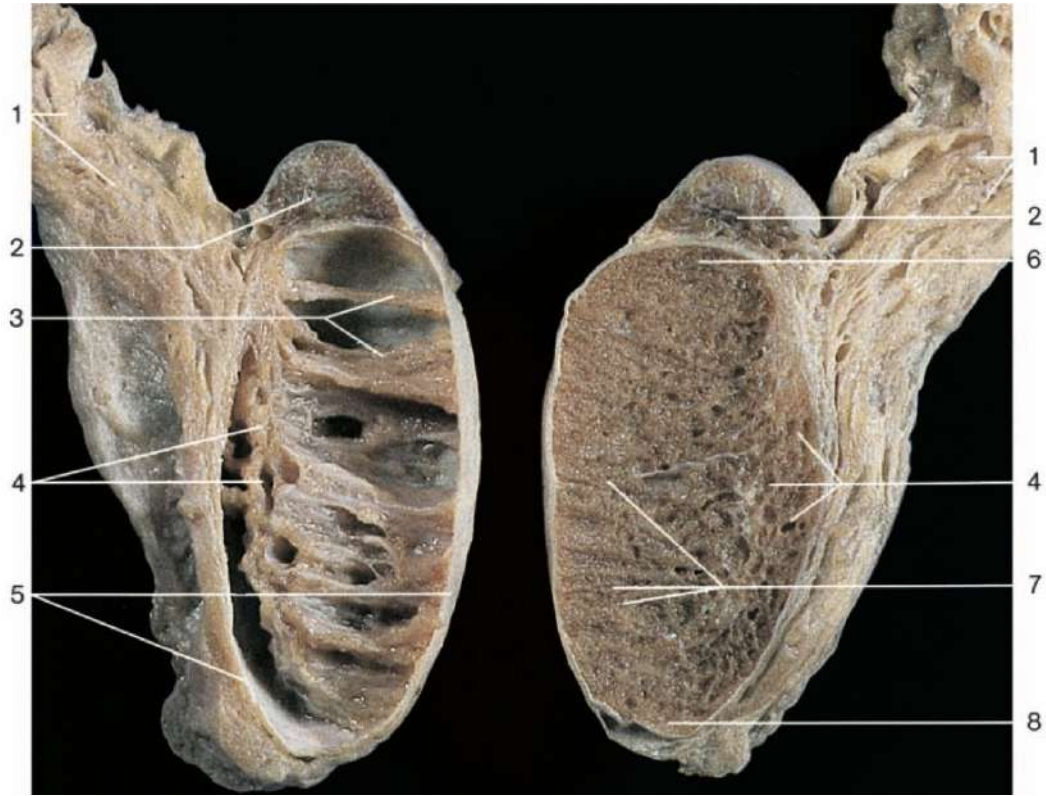

A. Identify structure A

Endometrium

B. Identify structure B

Uterine glands/Endometrial gland

10

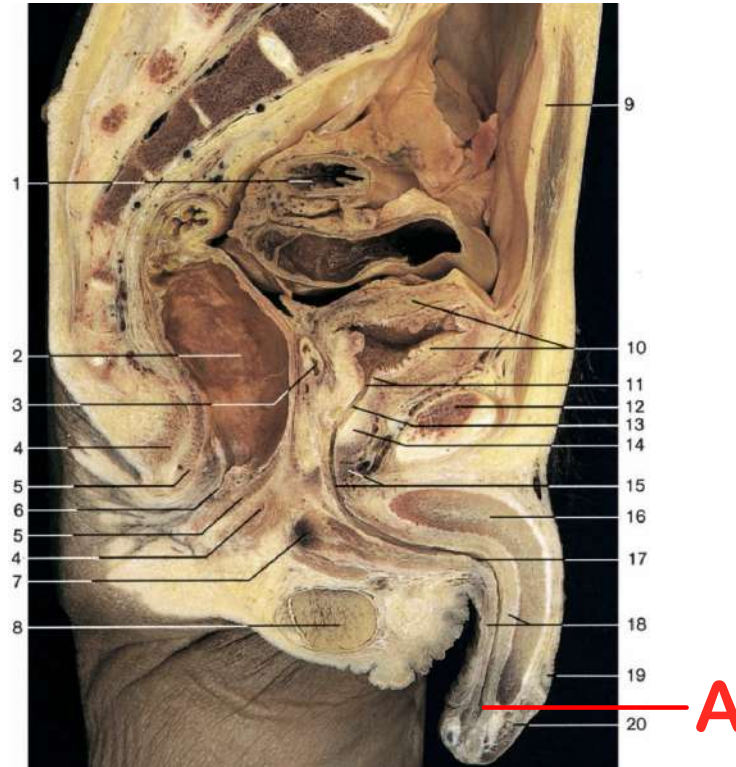

- A. Identify structure 2
B. What is its function?

Epididymis

Store sperm, sperm maturation

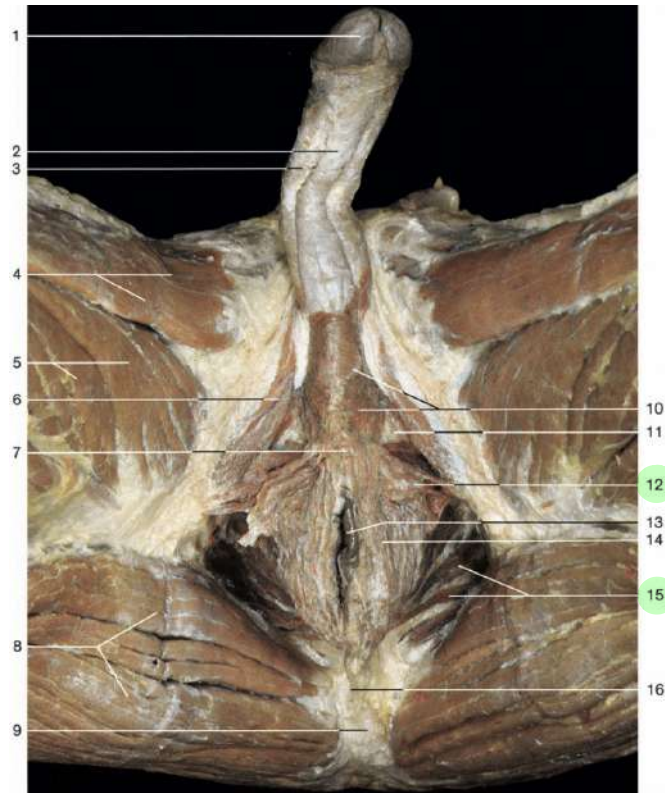

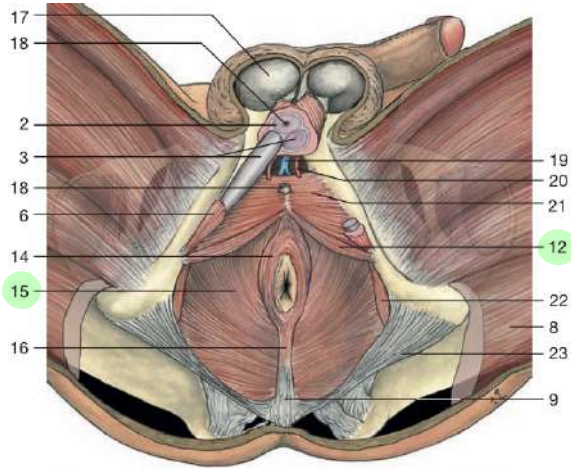

11

- A. Identify structure A
B. Identify structure 16

Fossa navicularis
Corpus cavernosum

12

A. Identify structure 12

Superficial transverse perineal m.

B. Identify structure 15

Levator ani muscle

13

Lumbosacral trunk

A. Identify nerve 20

B. Tell its origin

L4-L5

14

A. Identify structure 6

Bulb of penis

B. Identify structure 15

Glans of penis

15

A

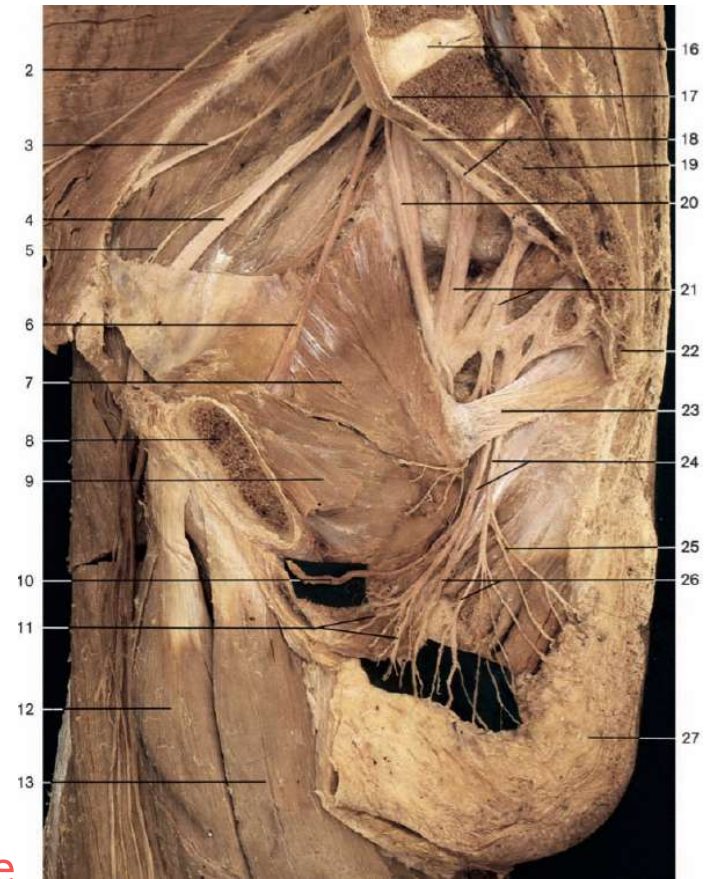

Functions .

- (i) support, nourish, protect spermatogenic cells
- (ii) residual body phagocytosis
- (iii) produce testicular fluid
- (iv) secrete inhibin B, activin A, Androgen-binding protein (ABP)
Growth factor, Aromatase, [Anti-Müllerian hormone(in fetus)]
- (v) blood-testis barrier

A. Identify cell A Sertoli cell
B. State 2 of its functions

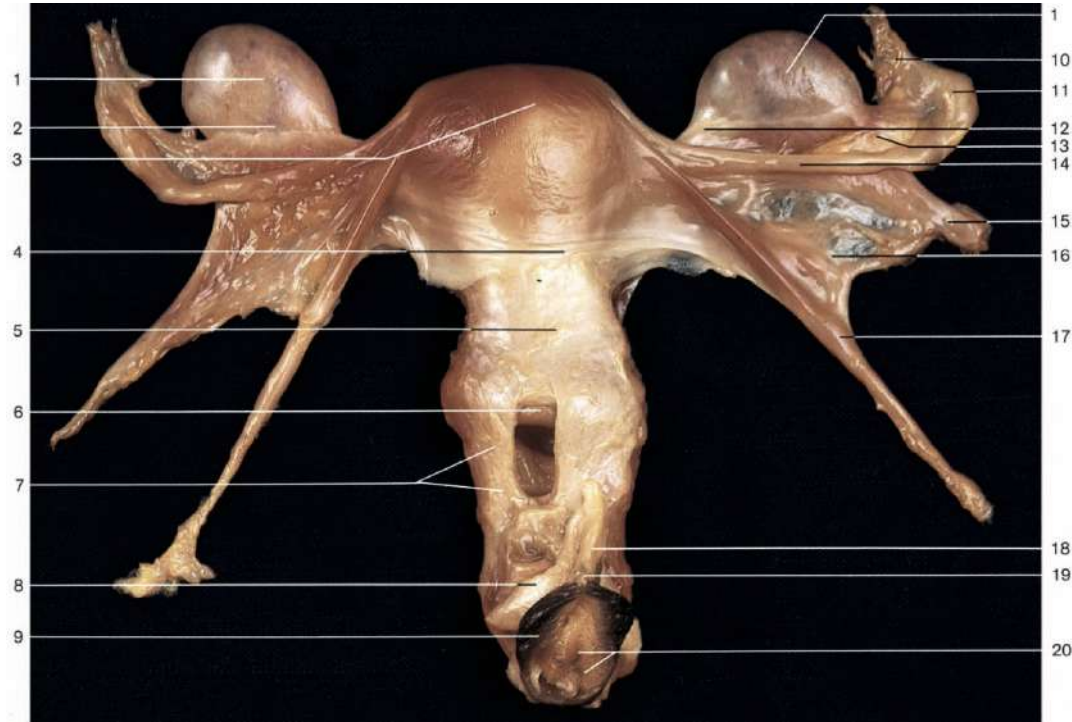

16

A. Identify nerve 6 **Obturator nerve**

B. Nerve 6 comes from which plexus? **Lumbar plexus**

17

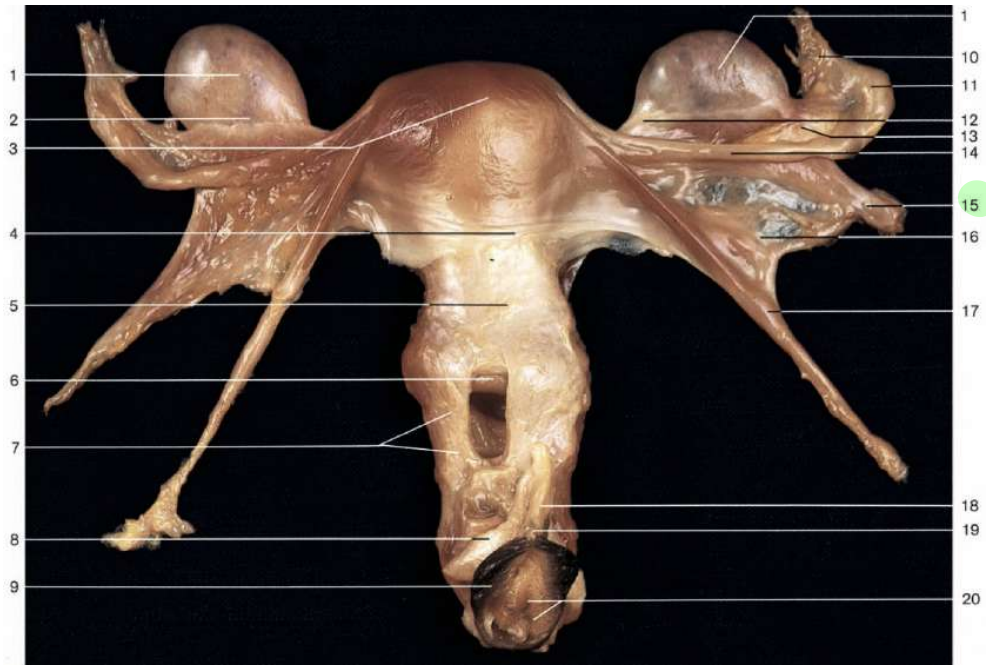

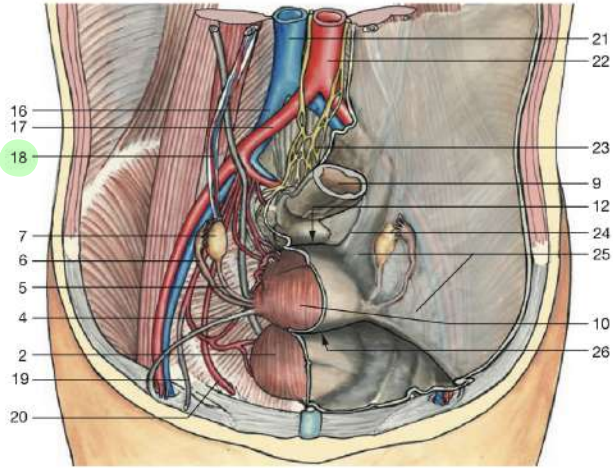

A. Identify structure 1

Ovary

B. Identify structure 17

Round ligament of uterus

18

Corpus cavernosum of clitoris (18 Rt pic)

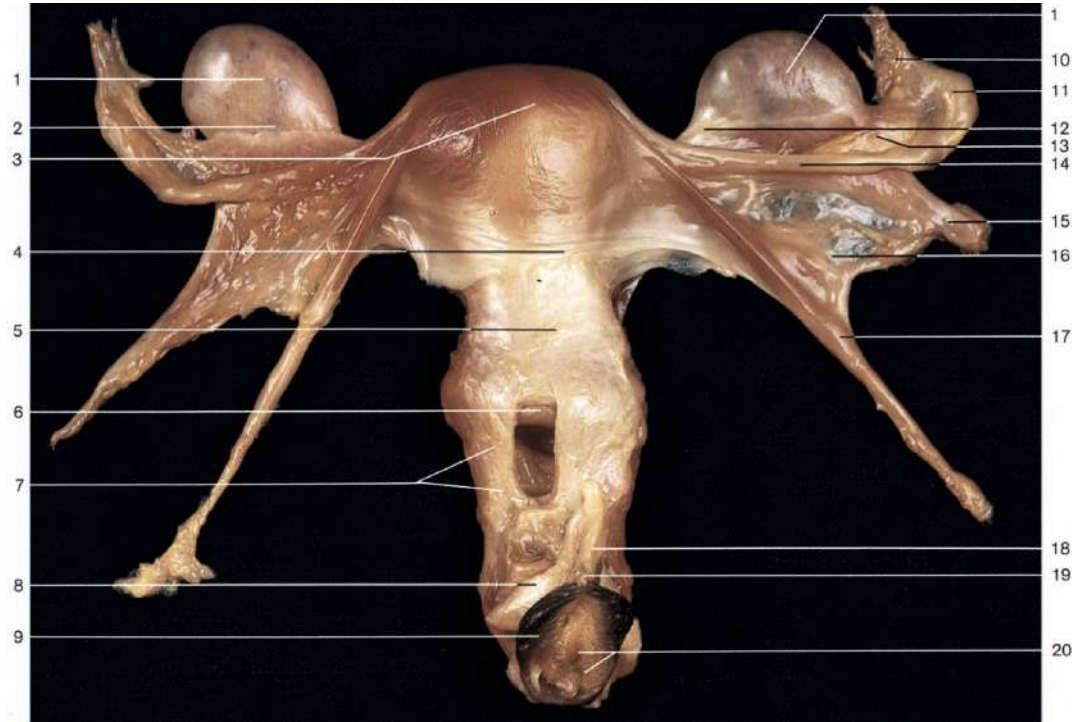

A. Identify structure 18

B. Identify structure 15

Ovarian vessels (Lt pic),

Suspensory ligament of ovary

19

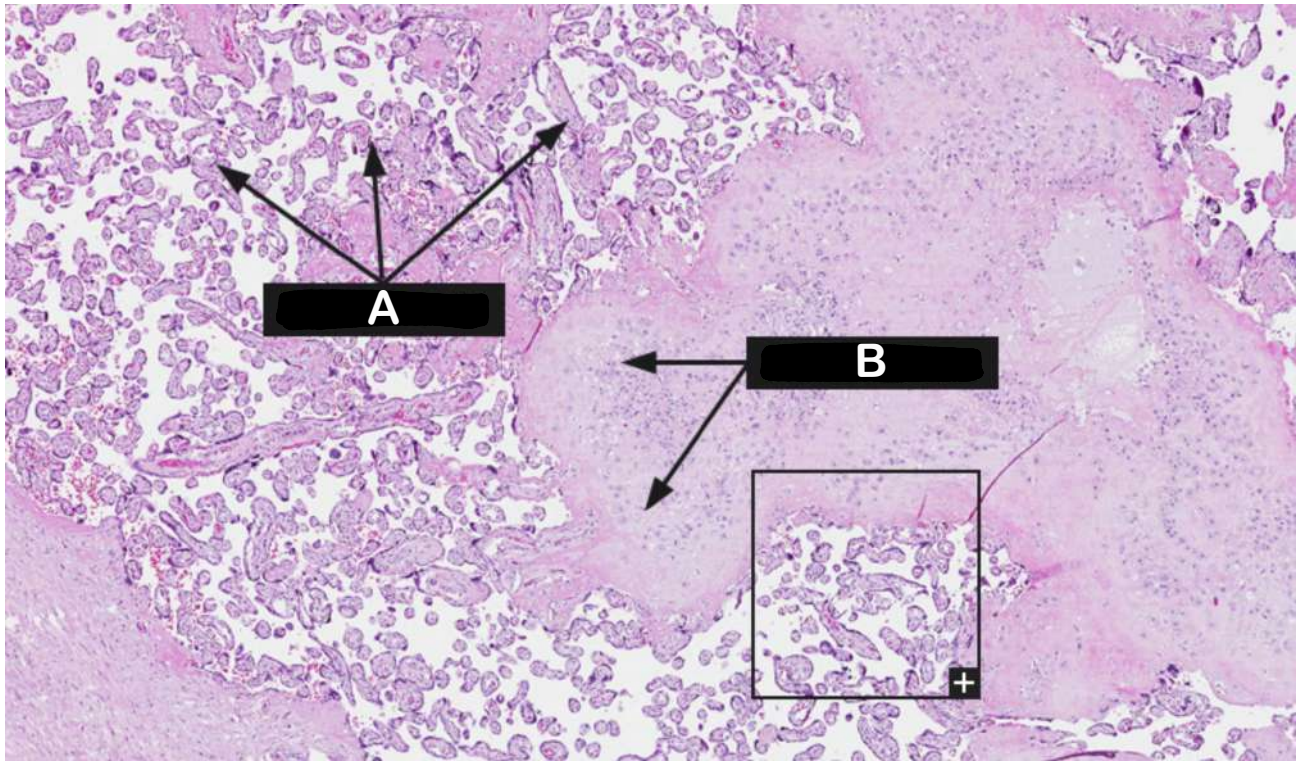

A. Identify structure 3

Fundus of uterus

B. Identify structure 5

Cervix of uterus

20

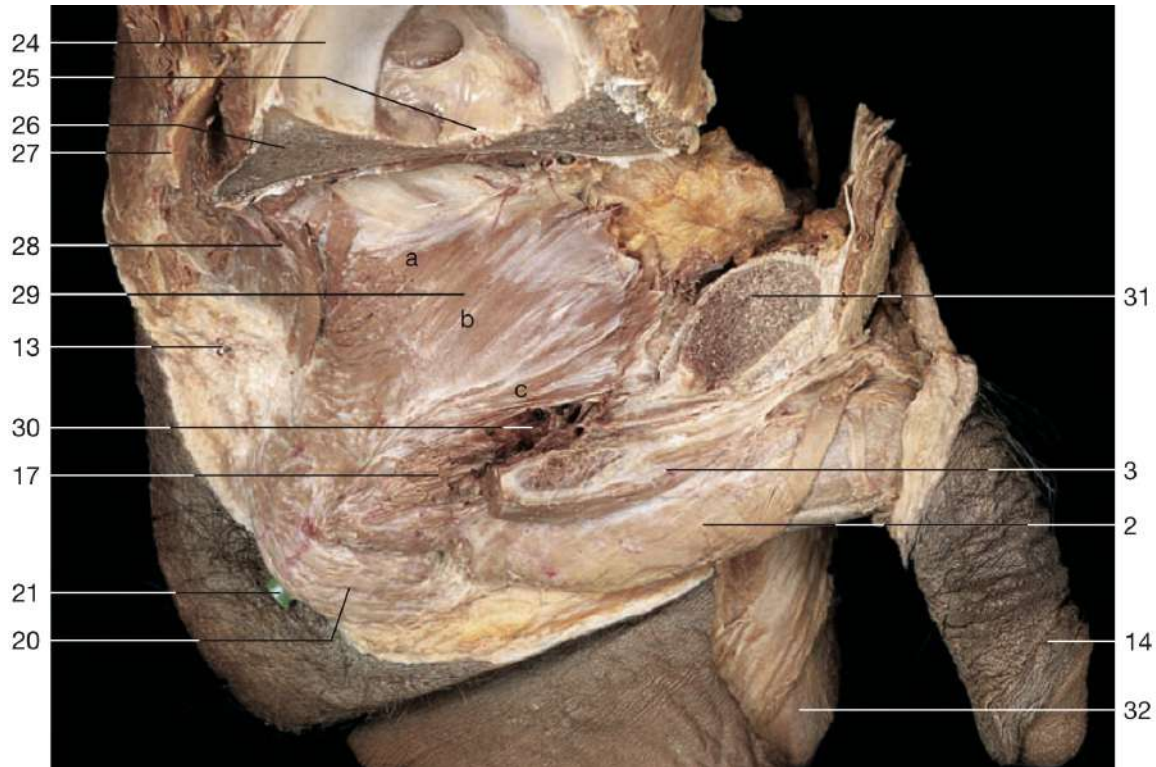

A. Identify structure A

Chorionic villus

B. Identify structure B

Decidua basalis

A. Identify structure 28

Coccygeus m. (Posterior to levator ani m.)

B. What is its insertion?

Inferior end of sacrum and coccyx

Origin : ischial spine

22

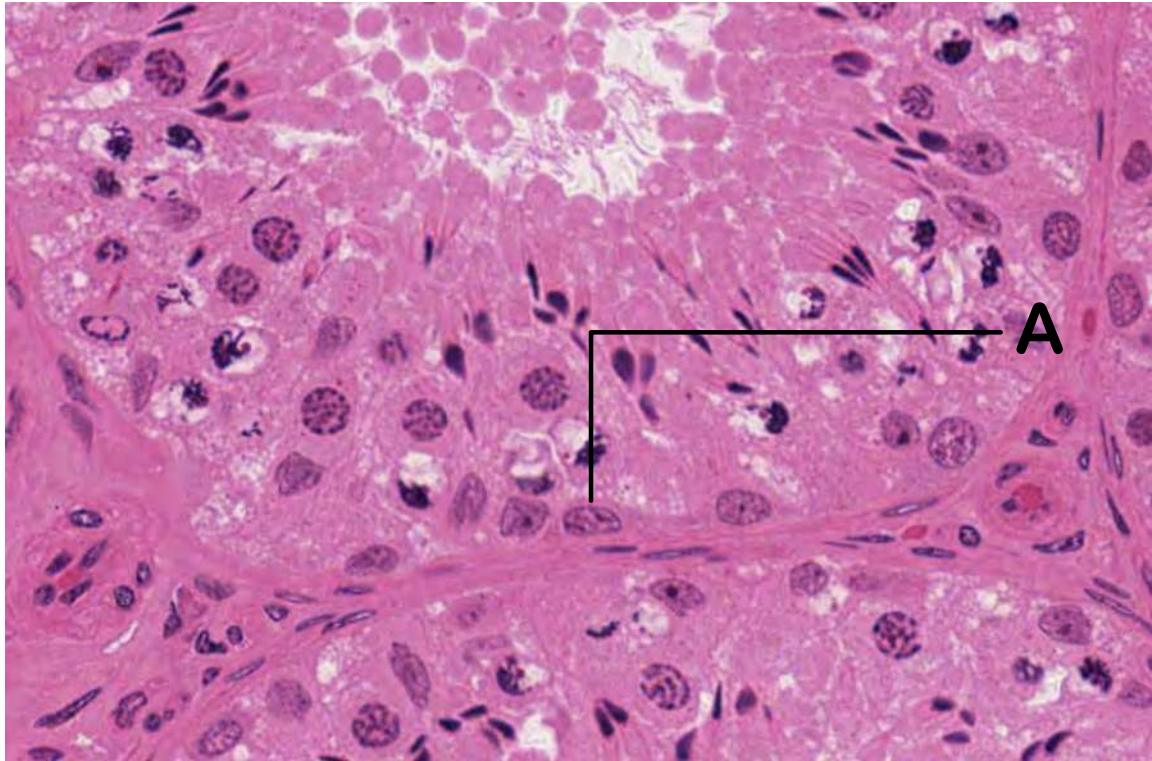

Female

A. The above pelvic bone likely belongs to male or female?

B. Give 2 reasons Oval-shaped pelvic inlet, wide sub-pubic angle

23

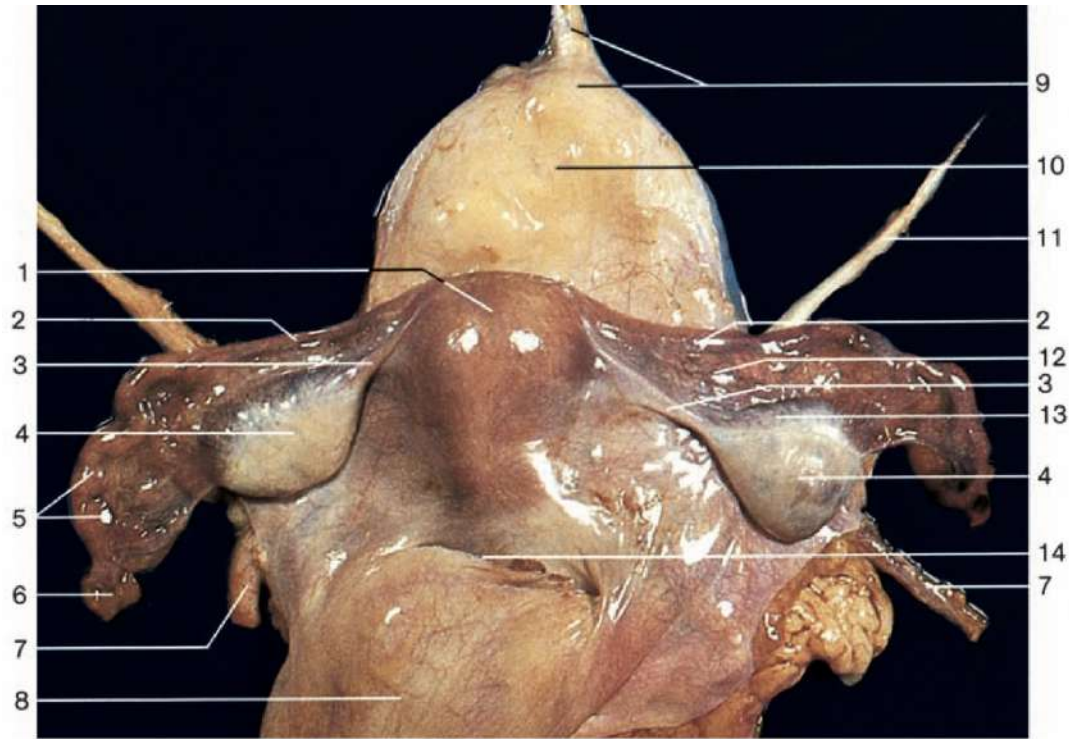

A. Identify cell A

B. What is its function?

Spermatogonic cell

Stem cells for spermatogenesis

Female genital organs, isolated (supero-posterior aspect).

A. Identify structure 13

Mesovarium

B. Identify structure 14

Rectouterine pouch

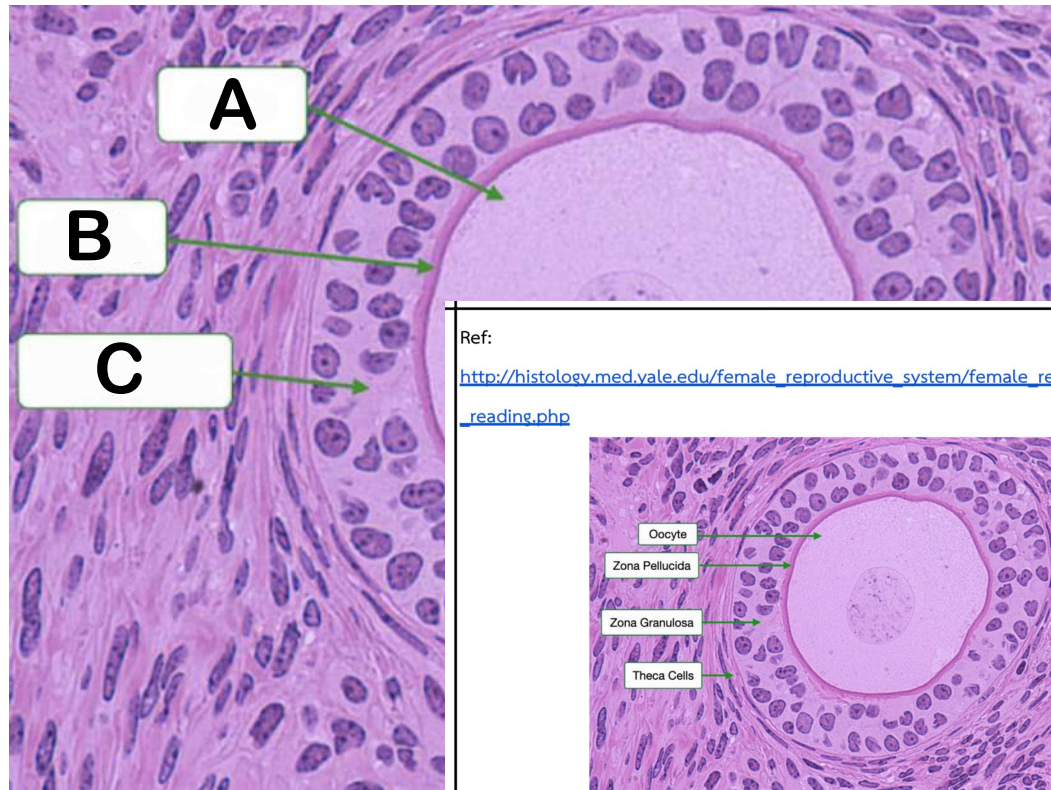

25

A. Identify structure 12 (be specific) Prostatic urethra

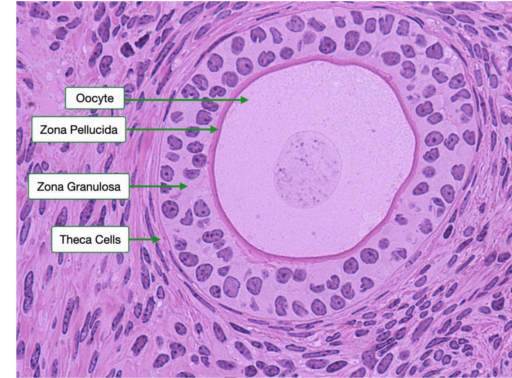

B. Identify structure B Inferior pubic ramus

26

Ref:

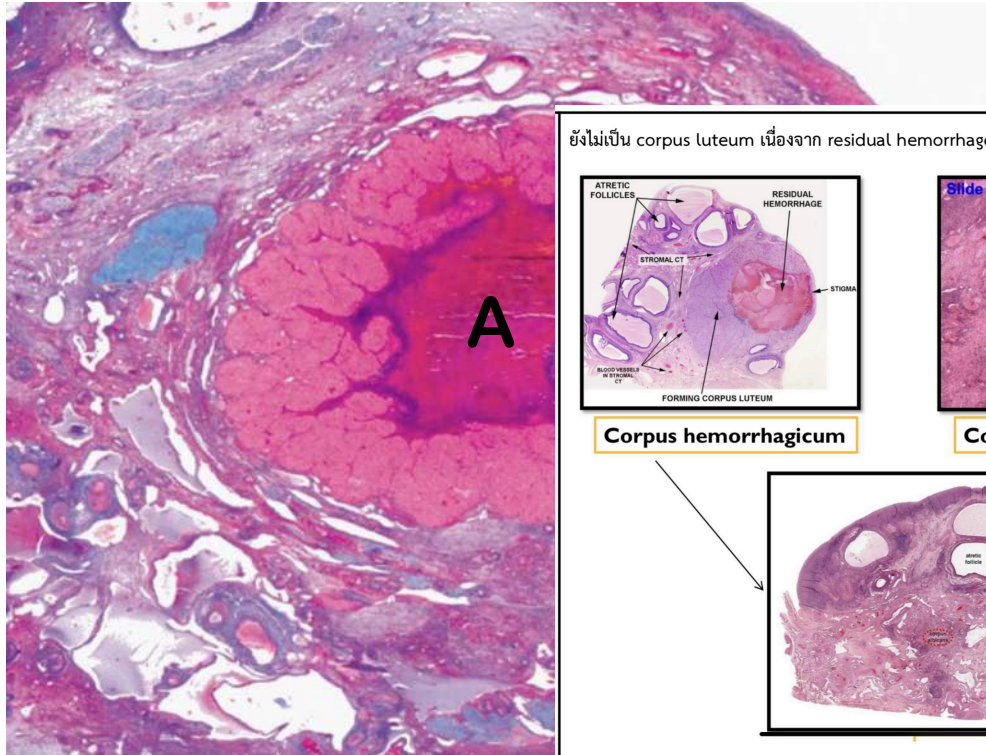

http://histology.med.vale.edu/female_reproductive_system/female_reproductive_system_reading.php

A. Identify structure A
B. Identify structure B

Oocyte

Zona pellucida

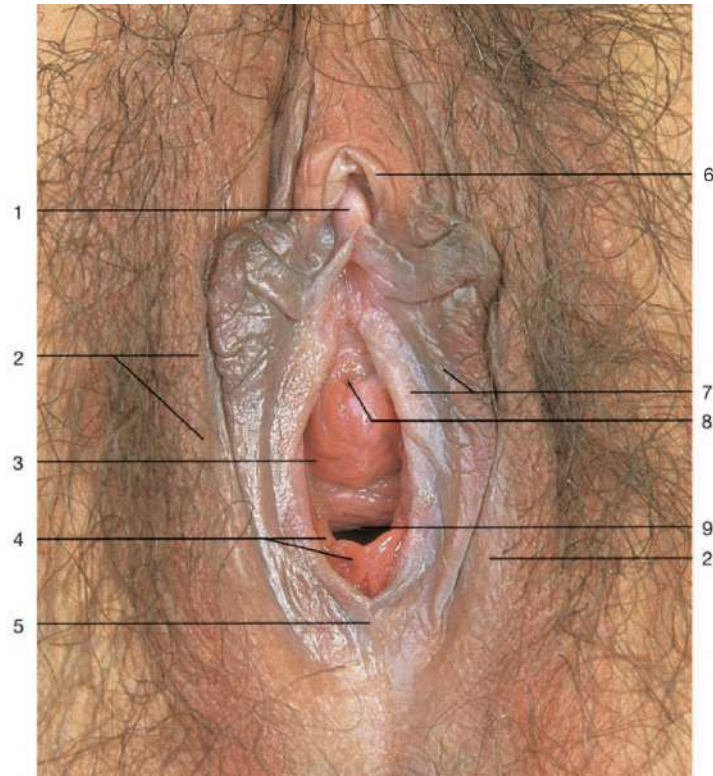

ยังไม่เป็น corpus luteum เนื่องจาก residual hemorrhage สีแดง อยู่ภายใน

- A. Identify structure A
B. What is its function?

Corpus hemorrhagicum

Transition stage between follicle and luteum

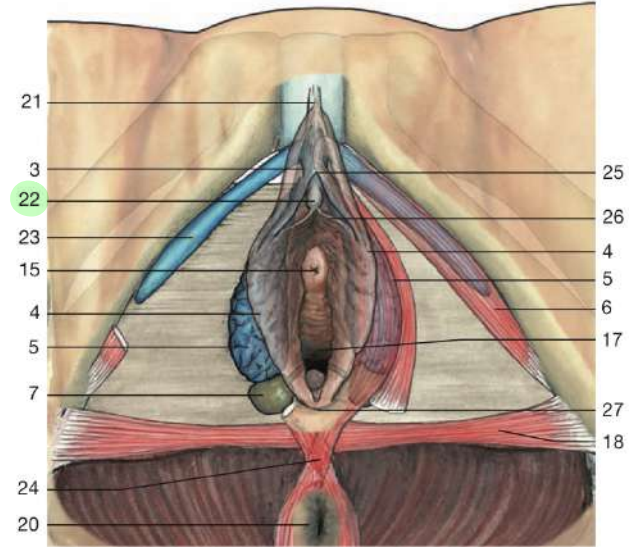

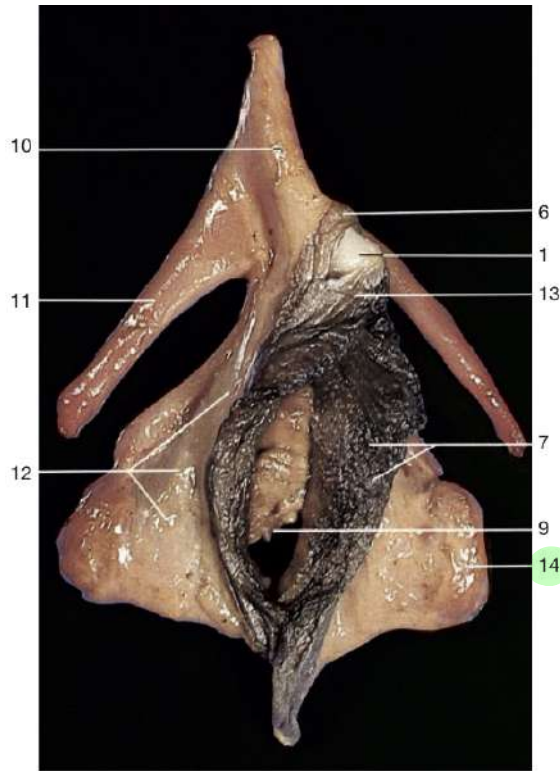

A. Identify structure 7

Labia minora

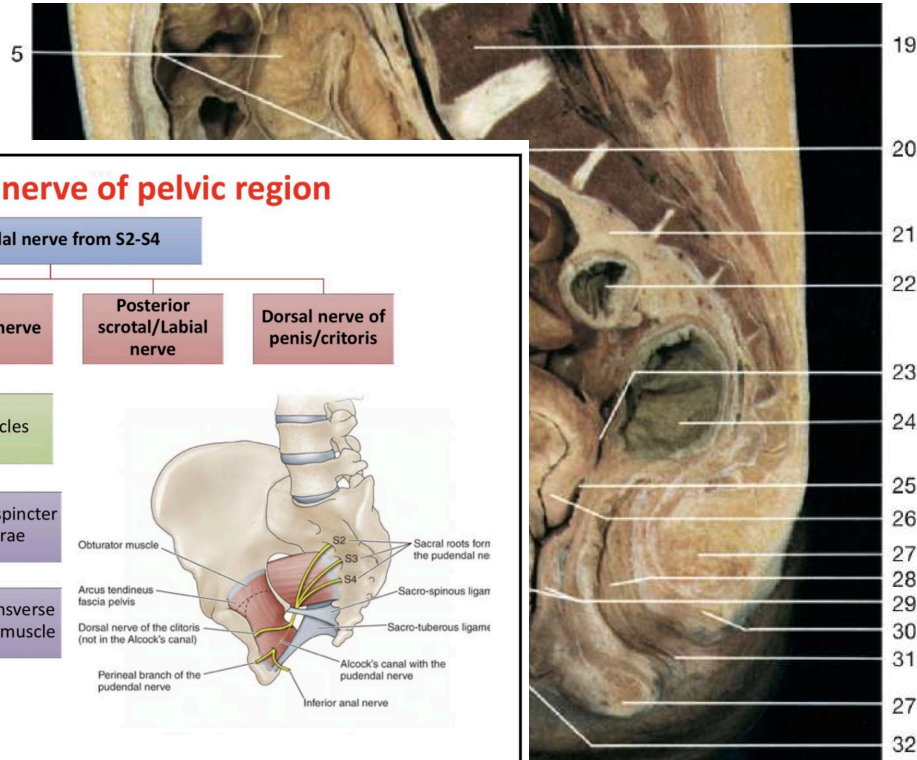

B. Identify structure 8

External urethral orifice

- A. Identify structure 14 Greater vestibular gland/Bartholin gland
- B. Identify structure 22 Glans of clitoris

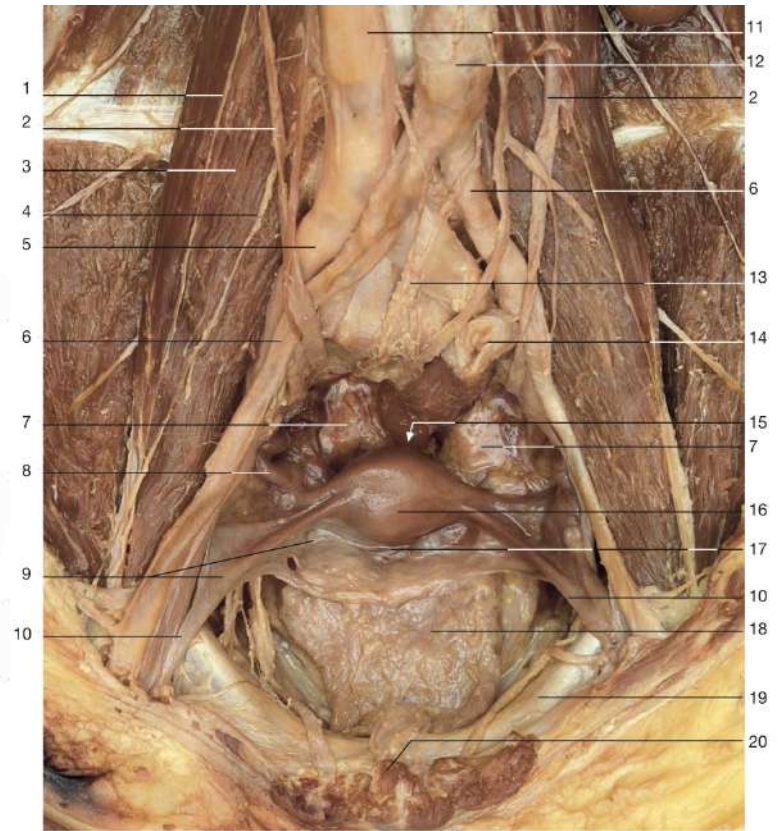

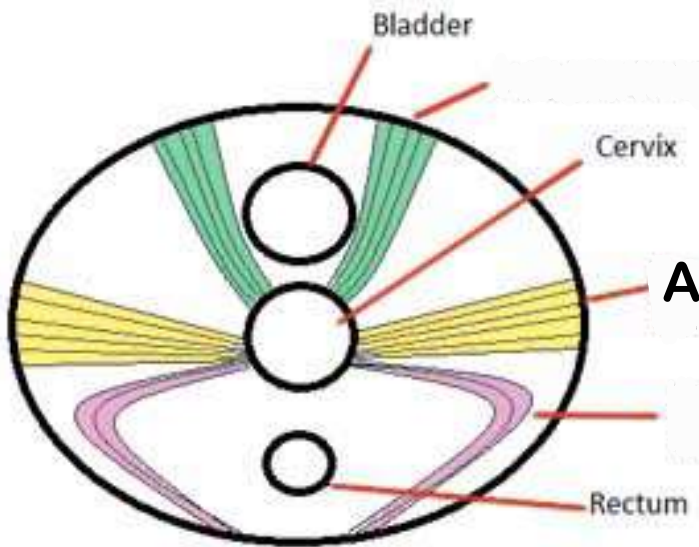

30

A. Identify structure 27
B. Tell its innervation

External anal sphincter
Pudendal nerve

31

- A. Identify ligament A Cardinal lig./Transverse cervical ligament
B. Identify nerve 13 Superior hypogastric plexus

32

A. Identify structure 2

Vas deferens

B. Identify structure 3

Seminal vesicle

33

A. Identify muscle 11

B. Identify structure 7

Perineal membrane

Perineal body
